

Jared Simonelli

Software Engineer | Front-End & Full-Stack Development | Rapid Prototyping

EXPERIENCE

Cigna, Remote — *Web IT Software Engineer Advisor*

JAN 2020 - PRESENT

- Lead front-end engineering for Benefits in Cigna's provider portal, serving millions of daily users; coordinate UI delivery across a six-person global team from requirements through release.
- Led a three-developer team through an end-to-end Auth0 integration and complete login-system overhaul, modernizing identity management and strengthening authentication security across the enterprise platform.
- Improve engineering productivity by championing team-wide Cursor adoption, securing access for all developers, serving as the team's primary support contact, and tracking usage across prototyping, refactoring, debugging, and delivery workflows.

Cigna, Philadelphia, PA — *Software Engineering & Innovations Lead Analyst*

MAY 2016 - JAN 2020

- Software Engineering & Innovations (SE&I) project lead, a rapid-prototyping team focused on MVPs; built web, full-stack, and VR concepts using Angular, Java, Spring, SQL, C#, and Unity.
- Built front-end features for Cigna's company-wide Fitness Challenge, where employees tracked activity, competed, and accessed health education; helped migrate the app from AngularJS to Angular.
- Prototyped VR scenes for a guided-relaxation pod and helped develop its brain-wave reader and data-collection tools to study brain activity during VR meditation.
- Built Anatomy Park as a separate educational VR MVP that guided users through the human body and taught anatomy through an interactive experience.
- Presented VR prototypes and trained internal and external technology audiences, translating experimental concepts into clear demonstrations.

SELECTED PROJECTS

Granny Theft Walker — *Sole Creator & Developer*

[Playable on portfolio](#). Built a playable 2D beat 'em up about a grandmother escaping a nursing home with a custom HTML5 Canvas engine and vanilla JavaScript; created combat, enemy AI, level progression, UX, and original visual assets.

Personal Software Prototypes, Personal Projects — *Creator & Developer*

Rapidly built a workout application and an AI/coding news aggregator to solve personal workflow needs; used Claude Code and OpenAI Codex as development assistants while owning product definition, UX, implementation, debugging, and iteration.

EDUCATION

Rochester Institute of Technology, Rochester, NY — *B.S., Game Design and Development*

CLASS OF 2016

Oakland, CA

(860) 424-1016

PROFILE

Software engineer with 10+ years of experience building and modernizing enterprise web applications, secure authentication systems, and rapid prototypes. Leads front-end delivery across global teams, translates ambiguous requirements into maintainable software, and communicates technical concepts through clear demonstrations.

Experience spans Angular and TypeScript, Java and Spring, Auth0, VR development, and practical AI-assisted engineering workflows.

ENGINEERING STRENGTHS

Application delivery:

Requirements, implementation, testing, and release coordination

Technical leadership: Team guidance, developer enablement, and cross-functional communication

Rapid prototyping: Problem discovery, MVP development, UX/UI, and end-to-end implementation

AI-assisted workflows:

Prompting, code generation, refactoring, debugging, and rapid iteration

TECHNICAL SKILLS

Front end: Angular, TypeScript, JavaScript, HTML5 Canvas, HTML, CSS, Redux

Back end & APIs: Java, Spring, Node.js, REST APIs, SQL

Prototyping & UX: C#, Unity, VR development, UX/UI, digital asset creation

Tools & practices: Auth0, Git, Postman, Agile, unit testing, Cursor, Claude Code, Codex
